

Steps to put DCDSA.com on your Andriod phone's Home Screen

- 1) Open dcdsa.com in chrome.
- 2) Click the 3 vertical dots in the upper right-hand corner.
- 3) Select "Add to Home Screen"
- 4) Place Icon in desired location on home screen.
- 5) Open icon from home screen and go to "Login" at the bottom of the page
- 6) Enter username and password

Another option is to get to the "Login" section of the website and then use the "Add to Home Screen" feature so your home screen icon takes you directly to the login for the members area. That is what I did, and it acts just like any other app on your phone.
